

## **President & CEO Message: Network Update**

You may have recently learned that PacificSource has announced its decision to discontinue health insurance operations in Montana effective January 1, 2027. We understand news like this may raise questions or create uncertainty, and we want to provide reassurance and clarity as additional information becomes available.

At this time, current PacificSource coverage will remain in place through December 31, 2026. Members should continue accessing care, filling prescriptions, and utilizing services as they normally would. There are no immediate changes to benefits, coverage, or provider access.

Providers should continue caring for PacificSource members as they do today, including verifying eligibility through standard processes. Claims submission, billing, and prior authorization processes will continue without disruption throughout 2026. PacificSource will also maintain the systems and support necessary beyond 2026 to ensure claims are processed and commitments are fulfilled.

PacificSource has published additional information and updates regarding this transition at:

<https://pacificsource.com/update>

As additional information becomes available, RMHN will continue to provide timely communication, updates, and guidance as we navigate this transition together.

Thank you for the trust you place in us. We remain committed to strengthening provider partnerships, delivering comprehensive management support, enhancing health outcomes, and improving the overall well-being of the communities we serve across Montana and Wyoming.

Warm Regards,

Darik Croft, MBA  
President/CEO  
Rocky Mountain Health Network
